Principal activity. The Bank's principal business activity is commercial and retail banking operations within Ukraine. The Bank has operated under a full banking licence issued by the National Bank of Ukraine (the "NBU") since March 1992. The Bank participates in the State deposit insurance plan (registration #113 dated 2 September 1999), which operates according to the Law №2740-III "On Individuals Deposits Guarantee Fund" dated 20 September 2001 (as amended). As at 30 June 2016 and 2015 Individuals Deposits Guarantee Fund guarantees repayment of individual deposits up to UAH 200 thousand per individual in case bank liquidation procedure is started.

As of 30 June 2016 the Bank had 30 branches and 2,531 outlets within Ukraine and a branch in Cyprus (31 December 2015: 30 branches, 2,589 outlets in Ukraine and a branch in Cyprus). Additionally, as at 30 June 2016 the Bank had the subsidiary bank in Latvia (31 December 2015: in Latvia) and representative office in Kyiv (Ukraine) and London (the United Kingdom), several consolidated structured entities in Ukraine and the United Kingdom. Consolidated structured entities in the United Kingdom are used for issue of Eurobonds.

The principal subsidiaries, included in the consolidated financial statements, were as follows:

| | Nature of | Country of | Percentage of ownership | | |

PRIVATBANK GROUP

Selected Explanatory Notes to the Interim Management Statement for the Six Month Period Ended 30 June 2016 (Unaudited)

1 Introduction (Continued)

As the parent company of AS PrivatBank didn't participated in the new share issue, its share in the capital of Latvian subsidiary diluted to 46,54%. Despite these changes, the Group still is one of the largest shareholders of AS PrivatBank and continues to exercise control over its Latvian subsidiary.

Registered address and place of business. The Bank's registered address is:

50, Naberezhna Peremohy Str., 49094, Dnipropetrovsk, Ukraine.

Presentation currency. These consolidated financial statements are presented in millions of Ukrainian hryvnias ("UAH million"), unless otherwise stated.

2 Operating Environment of the Group

Starting in late 2013 the political situation in Ukraine has experienced instability with numerous protests and continued political uncertainty that has led to a deterioration of the State's finances, volatility of financial markets and sharp depreciation of the national currency against major foreign currencies. The ratings of Ukrainian sovereign debt were downgraded by international rating agencies with negative outlooks for the future. The National Bank of Ukraine, among other measures, imposed certain restrictions on processing of client payments by banks and on the purchase of foreign currency on the inter-bank market.

The political situation in 2014 has also been volatile, with changes in the Ukrainian Parliament and the Presidency. In March 2014, various events in Crimea led to the accession of the Republic of Crimea to the Russian Federation. The Russian Federation, Mongolia, Syria, Kazakhstan are the only countries that recognised the referendum and the annexation. This event resulted in significant deterioration of relationships between Ukraine and the Russian Federation. Starting from March 2014, the Group was unable to conduct its operations in the Crimea. Refer to Note 4.

The political situation in Eastern Ukraine also deteriorated in 2014 resulting in armed conflict and military activity in some parts of Donetsk and Lugansk regions. The armed conflict in the region has put further pressure on relations between Ukraine and the Russian Federation. Escalating political tensions have had an adverse effect on Ukrainian financial markets, resulting in a hampering of ability of Ukrainian companies and banks to obtain funding from the international and capital and loan markets. This has contributed to further significant devaluation of Hryvnya against major foreign currencies.

Nevertheless in the second quarter 2016 the exchange rate of Hryvnia began to strengthen and NBU lowered the discount rate to 16.5% per annum from 24 June 2016 (to 15.5% per annum from 29 July 2016). According to the NBU, the positive change in environmental conditions since the end of the first quarter 2016, including unlock transiting and rising in prices on world commodity markets, has returned the economy to the path of recovery. Accordingly, the NBU forecast of real GDP growth on 1.1% in 2016 remains relevant.

The final resolution of the political and economic situation in Ukraine and the final effects of this are difficult to predict, but it may have further severe effects on the Ukrainian economy and the Group's business.

3 Summary of Significant Accounting Policies

Basis of Preparation. The accounting policies and methods of computation adopted in the preparation of the interim management statement are consistent with those followed in the preparation of the Bank's consolidated financial statements for the year ended 31 December 2015.

The Bank operates in an industry where significant seasonal or cyclical variations in operating income are not experienced during the financial year.

Any further changes to this interim management statement require approval of the Management Board who authorised this interim management statement for issue.

3 Summary of Significant Accounting Policies (Continued)

Income taxes. Income tax expense is recognised in each interim period based on the best estimate of the weighted average effective annual income tax rate expected for the full financial year. Amounts accrued for income tax expense in one interim period may have to be adjusted in a subsequent interim period of that financial year if the estimate of the weighted average effective annual income tax rate changes. Interim period income tax expense is accrued using the tax rate that would be applicable to expected total annual earnings; that is, the estimated average annual effective income tax rate is applied to the pre-tax income of the interim period.

Foreign currency translation. The functional currency of each of the Group's consolidated entities is the currency of the primary economic environment in which the entity operates. The functional currency of the Bank, and the Group's presentation currency, is the national currency of Ukraine, Ukrainian hryvnia ("UAH").

The principal rates of exchange used for translating foreign currency balances were as follows:

| | 30 June 2016, UAH | Average 2016, | 31 December 2015, | Average 2015, |
|-------------------|-------------------|---------------|-------------------|---------------|
| | | UAH | UAH | UAH |
| 1 US Dollar (USD) | 24,854409 | 25,457780 | 24,000667 | 21,821706 |
| 1 Euro (EUR) | 27,563540 | 28,414959 | 26,223129 | 24,200490 |

4 Critical Accounting Estimates, and Judgements in Applying Accounting Policies

The Group makes estimates and assumptions that affect the amounts recognised in the consolidated financial statements and the carrying amounts of assets and liabilities within the next financial period. Estimates and judgements are continually evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Management also makes certain judgements, apart from those involving estimations, in the process of applying the accounting policies. Judgements that have the most significant effect on the amounts recognised in the consolidated financial statements and estimates that can cause a significant adjustment to the carrying amount of assets and liabilities within the next financial period include:

Impairment losses on loans and advances. The Group regularly reviews its loan portfolios to assess impairment. In determining whether an impairment loss should be recorded in profit or loss for the period, the Group makes judgements as to whether there is any observable data indicating that there is a measurable decrease in the estimated future cash flows from a portfolio of loans before the decrease can be identified with an individual loan in that portfolio. This evidence may include observable data indicating that there has been an adverse change in the payment status of borrowers in a group, or national or local economic conditions that correlate with defaults on assets in the group. Management uses estimates based on historical loss experience for assets with credit risk characteristics and objective evidence of impairment similar to those in the portfolio when scheduling its future cash flows. The methodology and assumptions used for estimating both the amount and timing of future cash flows are reviewed regularly to reduce any differences between loss estimates and actual loss experience. The fair value of collateral substantially contributes to the assessment of whether there is an impairment of loans issued to oil traders. As of 30 June 2016 the loans issued to oil traders were not impaired. A 10% increase or decrease in actual loss experience compared to the loss estimates used would result in an increase or decrease in loan impairment losses of UAH 461 million or UAH 1015 million (30 June 2015: increase or decrease in loan impairment losses of UAH 588 million or UAH 714 million), respectively. Impairment losses for individually significant loans are based on estimates of discounted future cash flows of the individual loans, taking into account repayments and realisation of any assets held as collateral against the loans. A 10% increase or decrease in the actual loss experience compared to the estimated future discounted cash flows from individually significant loans, which could arise from differences in amounts and timing of the cash flows, would result in an increase or decrease in loan impairment losses of UAH 1,407 million or UAH 1,769 million (30 June 2015: increase or decrease in loan impairment losses of UAH 1,310 million or UAH 1,650 million), respectively.

Accounting for assets and liabilities associated with operations in the Donetsk and Lugansk regions. As at 30 June 2016, the Group has assets and liabilities in the areas of Donetsk and Lugansk regions which are not controlled by the Ukrainian government. Whilst management believes it is taking appropriate actions to reinstate the control over or recovery of its assets in Donetsk and Lugansk regions, violence and armed conflict negatively affect the Group's operations and financial position. These consolidated financial statements reflect management's assessment of the recoverability of assets located in the Donetsk and Lugansk regions. The final outcome may differ from the management's assessment. Please refer to Note 7 for more details in relation to assets associated with the operations in these areas.

PRIVATBANK GROUP

Selected Explanatory Notes to the Interim Management Statement for the Six Month Period Ended 30 June 2016 (Unaudited)

4 Critical Accounting Estimates, and Judgements in Applying Accounting Policies (Continued)

Provision associated with Crimea liabilities. As described in Note 17 the Group has recognised a provision of UAH 700 million relating to cessation of its operations in Crimea. Provision was assessed based on the probable future negative outcome of the claims presented against the Group and unfavourable resolution of the disputes the Group is being party to. Recognising the provision management made significant judgements by estimating the level of complaints, ability of plaintiff to present documents supporting deposits placement, enforceability of various courts decisions in Ukraine, related administrative and legal costs estimations. If the level of complaints had been 10% higher/(lower) and winning rate was 10% higher/(lower) than estimated then the provision as at 30 June 2016 would have been increased/(decreased) by approximately UAH 147 million (2015: UAH 147 million).

Tax legislation. Ukrainian tax, currency and customs legislation is subject to varying interpretations. Refer to Note 17.

Assessment of loans and advances issued to a group of borrowers-oil traders for impairment. The Group regularly reviews its outstanding loans and advances issued to the oil traders which are engaged in wholesale and retail sale of petrol, oil and oil products. As of 30 June 2016 gross amount of such loans was UAH 41,008 million (31 December 2015: UAH 40,645 million). In determining whether an impairment loss should be recorded in profit or loss, the Group makes judgements as to whether there is any observable data indicating that there is a measurable decrease in the estimated future cash flows from a portfolio of loans issued to oil traders before the decrease can be identified with an individual loan in that portfolio. This evidence may include observable data indicating that there has been an adverse change in the payment status of borrowers in an oil traders group or regulatory, industry or national economic conditions that correlate with defaults on assets in the oil traders group. Management uses estimates based on historical loss experience for assets with credit risk characteristics and objective evidence of impairment similar to those in the portfolio when scheduling its future cash flows. The methodology and assumptions used for estimating both the amount and timing of future cash flows are reviewed regularly to reduce any differences between loss estimates and actual loss experience. The fair value of collateral substantially contributes to the assessment of whether there is an impairment of loans issued to oil traders. As of 30 June 2016 the loans issued to oil traders were not impaired. Please refer to Notes 7 and 19.

Fair value of embedded derivative assets. The fair values of financial derivatives that are not quoted in active markets are determined by using valuation techniques. Where valuation techniques (for example, models) are used to determine fair values, they are validated and periodically reviewed by qualified personnel independent of the area that created them. To the extent practical, models use only observable data, however areas such as credit risk (both own and counterparty), volatilities and correlations require management to make estimates. The fair value of collateral substantially contributes to the assessment of a credit risk of a borrower. Changes in assumptions about these factors could affect reported fair values.

Starting from December 2015, the banks in Ukraine were required to apply IFRS in local accounts used for daily reporting to the National Bank of Ukraine and for regulatory purposes. At the same time, the local regulatory requirements on methodology of accounting of the embedded derivatives are subject to further clarification in course of transition to IFRS.

As of 30 June 2016 the Bank had loans and advances to customers totalling UAH 89,933 million (31 December 2015: UAH 91,318 million) issued in UAH with the condition of compensation to be received by the Bank in the event that the official exchange rate of UAH depreciates against USD, part of them in amount UAH 64,117 million (2015: UAH 62,574 million) with yield limit. The contract to receive compensation was accounted for by the Bank as an embedded derivative assets with the fair value of UAH 23,239 million as at 30 June 2016 (31 December 2015: UAH 30,673 million) estimated using a valuation technique. This discounted cash flow valuation technique takes into account expected movements in exchange rates, discount factor and credit risk. Changing the assumptions about expected exchange rates may result in a different financial result. The major part of loan agreements matures from 2016 to 2019, inclusive.

4 Critical Accounting Estimates, and Judgements in Applying Accounting Policies (Continued)

Going concern and compliance with local regulatory requirements. Due to significant further UAH devaluation in 2015 against major hard currencies (refer to Note 2), overall lack of trust to the banking system in Ukraine resulting in outflow of customer accounts in 2015 and preference of keeping money at short-term accounts rather than at long-term deposits, continuous negotiation with the NBU regarding the restructuring of term expensive debts, significant part of which was overdue based on contractual terms being in force at the year-end (refer to Note 11), and prolongation of loans and advance to borrowers to a later period resulted in a short-term liquidity gap up to one months of UAH 27,748 million and accumulative liquidity gap of up to one year of UAH 36,060 million (refer to Note). In accordance with the NBU regulation No.363 issued on 9 June 2015, Ukrainian banks were allowed to initiate the restructuring of refinancing loans, provided the bank's application for the restructuring will be supported by the detailed plan of the financial rehabilitation. In such case, the refinancing loan final maturity term can be postponed to June 2020, with gradual repayments starting from the second year of the restructured maturity term. In July 2015, the Bank applied to the NBU with developed Plan of Financial Rehabilitation, which included commitment to increase the share capital, gradual compliance with the regulatory norms of liquidity, regulatory capital and matching of assets and liabilities by maturity terms.

During 2015 and after the reporting date, the Bank was not in compliance with certain prudential ratios. On 24 February 2015, the NBU issued the regulation No.129 "On certain issues of the Banks' activities" which allowed non-compliance by all Ukrainian banks with certain ratios and requirements, including those breached by the Bank, provided the non-compliance was caused by losses incurred as a result of the negative impact of operating environment in Ukraine. Compliance with the NBU requirement on capital adequacy ratio is one of the debt covenants, however no early repayment or other sanctions are envisaged by the terms of these debts.

In 2015 the NBU identified a few instances of non-compliance with conditions of refinancing loans from the NBU. However, the NBU did not requested early repayment of the refinancing loans as at 30 June 2016 and subsequently in 2016.

As a result of that and further negotiations held by the Bank with the NBU about restructuring of refinancing loans, in February and March 2016 the NBU has approved new Restructuring Plan and its amendment, according to which the Bank was required to further increase the share capital, attract additional subordinated debt, repossess part of collateral by 1 April 2016, gradually decrease a share of loans issues to related parties and insiders of the Bank, obtain additional collateral for significant part of loans by 1 September 2016, gradually repay overdue principal and interest on the NBU refinancing loans by August 2017 and provide additional collateral for the NBU's refinancing loans. This plan also contains a number of limitations on the Bank's active and passive operations.

Following the approval of the Restructuring Plan the Bank actively commenced taking appropriate measures aimed at fulfilling the Plan:

- a) as at the date of these consolidated financial statements, the Bank obtained a legal title for the required amount of collateral under the Plan and accounted for it in its consolidated balance sheet as repossessed collateral. However, due to long and complex legal procedure of collateral repossession in Ukraine and necessity of obtaining the NBU's permission for repossession of certain assets, which were already pledged in favour of the NBU for refinancing loans, the Bank was able to repossess the required part of collateral by early June rather than by 1 April 2016 as was stipulated by the NBU. The NBU has not applied any regulatory measures for late repossession of collateral by the date of these consolidated financial statements;
- b) in 2016 the Bank repaid on time all interest due on refinancing loans from the NBU and principal according to the agreed schedule in total amount of UAH 4,508 million;
- c) one of the Bank's shareholders, Mr. I.V. Kolomoysky, provided his personal guarantee confirming the Bank's ability to follow the Restructuring Plan.

Management has also prepared monthly cash flow projections for periods throughout 2016 and first six months of 2017. Judgements with regard to further UAH devaluation, sustainability of customers' balances, level of inflation in Ukraine, reduced tensions in the East of Ukraine, financial ability of borrowers to repay their loans and respective derivative amounts as they fall due, ability to negotiate additional collateral for the loans issues to the Bank's borrowers were required for the preparation of the cash flow projections. Further support and maintaining of constructive dialogue with the NBU, CBC and FCMC are crucial in the Bank's going concern assessment.

4 Critical Accounting Estimates, and Judgements in Applying Accounting Policies (Continued)

Events and conditions described above increase the Bank's and the Group's exposure to reputational, compliance and liquidity risks. Management is taking all appropriate actions to fulfil the Restructuring Plan, comply with the regulatory requirements of the countries where it operates and manage its liquidity gap. In case if the Bank would not be able to implement the Restructuring plan, further renegotiation of the restructuring terms with the NBU would be necessary. Management considers application of going concern assumption for the preparation of these consolidated financial statements is appropriate.

Defining of related party and initial recognition of related party transactions. In the normal course of business the Group enters into transactions with its related parties. IAS 39 requires initial recognition of financial instruments based on their fair values. Judgment is applied in determining if transactions are priced at market or non-market interest rates, where there is no active market for such transactions. The basis for judgment is pricing for similar types of transactions with unrelated parties and effective interest rate analysis. Judgement is also applied to determine whether the counterparty is a related party or not including transitions with those entities where the major shareholders of the Bank individually directly or through intermediaries beneficiary owns a share in the share capital.

5 Cash and Cash Equivalents and Mandatory Reserves

In accordance with the NBU regulation, the Bank should maintain the mandatory reserve balance at the level of 3 to 6.5 per cent (31 December 2015: 3 to 6.5 per cent) of its certain obligations.

As at 10 July 2016, according to the NBU requirements the Bank was to be compliant with required level of mandatory reserve balance of UAH 7,104 million.

As of 30 June 2016 the mandatory reserve balances of the Bank's subsidiary in Latvia and branch in Cyprus that should be kept with respective central banks were UAH 247 million (31 December 2015: Latvia and Cyprus; UAH 287 million).

As the respective liquid assets are not freely available to finance the day-to-day operations of the Group, for the purposes of the consolidated statement of cash flow, the mandatory reserve balance is excluded from cash and cash equivalents of UAH 247 million, that is 100% of the mandatory reserve balance with the NBU and 100% of the mandatory reserve balance with other Central Banks (31 December 2015: UAH 287 million).

The primary factor that the Group considers in determining whether a balance is impaired is its overdue status.

As an active participant in the banking markets, the Group has a significant concentration of credit risk with other financial institutions. In total, credit risk exposure to financial institutions is estimated to have amounted to gross amount of UAH 39,000 million (31 December 2015: UAH 24,352 million) comprising cash and cash equivalents, due from other banks and gross receivables on financial derivatives arising on swap, forward and spot transactions. Refer to Notes 5 and 17.

Refer to Note 19 for the estimated fair value of each class of amounts due from other banks.

The Group applied the portfolio provisioning methodology prescribed by IAS 39, *Financial Instruments: Recognition and Measurement*, and created portfolio provisions for impairment losses that were incurred but have not been specifically identified with any individual loan by the end of the reporting period. The Group's policy is to classify each loan as 'neither past due nor impaired' until specific objective evidence of impairment of the loan is identified.

The primary factors that the Group considers in determining whether a loan is impaired are its overdue status, a significant financial difficulty as evidenced by the borrower's financial information and decrease in the fair value of related collateral and its realisability. As a result, the Group presents above an ageing analysis of loans that are individually determined to be impaired.

18

Past due but not impaired loans, represent collateralised loans where the fair value of collateral covers the overdue interest and principal repayments, except for card loans and consumer loans for which impairment is recognised starting from 90 days past due. The amount reported as past due but not impaired is the whole balance of such loans, not only the individual instalments that are past due.

The Group believes that loans and advances to large and small size borrowers with longer credit history are of a higher credit quality than the rest of the loan portfolio.

The financial effect of collateral is presented by disclosing collateral values separately for (i) those assets where collateral and other credit enhancements are equal to or exceed carrying value of the asset ("over-collateralised assets") and (ii) those assets where collateral and other credit enhancements are less than the carrying value of the asset ("under-collateralised assets"). Mortgage loans are secured by underlying housing real estate. Auto loans are secured by the underlying cars. Loans to small and medium enterprises are secured by underlying commercial real estate, equipment or commercial cars. Finance lease receivables due from individuals and from corporate customers are secured by cars and real estate. The tables below exclude cards loans, consumer and part of loans to small and medium enterprises in amount of UAH 624 million (31 December 2015: UAH 0 million), issue of which do not require any collateral.

As at 30 June 2016 loans issued to the borrowers in Ukraine other than those engaged in oil trading and manufacturing and chemicals industry of UAH 77,099 million (31 December 2015: UAH 73,684 million) were collateralised with corporate rights for shares in the share capital of these borrowers and their guarantors with the collateral value of UAH 73,797 million (31 December 2015: UAH 65,265 million). The loans are collateralised with corporate rights for shares of companies domiciled in Ukraine, EU and CEE; collateral agreements are concluded under the UK law. In addition these loans are collateralised by inventory and other assets.

Upon initial recognition of loans and advances to customers, the fair value of collateral is based on valuation techniques commonly used for the corresponding assets, market prices, indexes of similar assets.

The contractual maturity of the NBU refinancing loan tranches outstanding as at 30 June 2016 with the total carrying amount of UAH 24,351 million varies from December 2016 to April 2017. Included in the total amount due to the NBU is the past due amount of UAH 14,159 million (2015: UAH 16,720 million).

In March 2016 for tranches were received in March 2014 and in April 2014 the maturity date was changed on August 2017.

9 Due to the NBU (Continued)

In February – March 2016 the revised payment schedule on the NBU refinancing loans was agreed between the Bank and the NBU. The Bank repays UAH 650 million monthly instalments starting from March 2016 in accordance with the revised payment schedule, with gradual increase of the amounts to be repaid, and the final maturity stated in August 2017. The total amount paid by the Bank to the NBU in 2016 up to the date of the approval of these consolidated financial statements for the issue comprises UAH 5,640 million, including the portion of main debt scheduled for repayment and the accrued interest. Refer to Note 4.

In March 2016, in course of the restructuring of the NBU refinancing loans, the interest rate on all the NBU refinancing loan tranches was fixed at level of interest rates set as of 9 June 2015, the date of the NBU regulation No.363, which allowed Ukrainian banks to initiate the restructuring of refinancing loans (refer to Note 4). Further amendments to the NBU refinancing loan tranche agreements should set the interest rate at level not higher than the NBU official interest rate plus 1.5% margin.

In 2016 the Bank repaid the refinancing loans in the amount of UAH 2,600 million (2015: UAH 1,493 million).

Assets pledged under the NBU refinancing loans are as follows:

| In millions of Ukrainian hryvnias | Note | 30 June 2016 | 31 December 2015 |

The nominal registered amount of the Bank's issued share capital at 30 June 2016 is UAH 21,257 million (31 December 2015: UAH 21,257 million). The total authorised number of ordinary shares is 75.92 million shares (31 December 2015: 75.92 million shares) with a par value of UAH 280 per share (31 December 2015: UAH 280 per share). All issued ordinary shares are fully paid. Each ordinary share carries one vote.

As at 30 June 2016, 8.7 million shares of the Bank or 11.46% of share capital are pledged as collateral on loans from the National Bank of Ukraine (31 December 2015: 8.7 million shares of the Bank or 11.46% of share capital). Refer to Note 9.

Included in retained earnings is reserve capital established in accordance with the requirements of the Ukrainian legislation amounting to UAH 1,429 million (31 December 2015: UAH 1,427 million). The Bank is required to establish reserve capital by transferring an amount from retained earnings to a non-distributable reserve. The amount to be transferred each year is calculated as the net profit for the preceding year before distribution of dividends attributable to ordinary shareholders of not less than 5% of current period profit until reserve capital will reach 25% of regulatory capital of the Bank.

In June 2015 the Group received USD denominated subordinated debt of USD 80 million (UAH 1,694 million at the exchange rate at the date of issue) at contractual rate of 11% per annum payable every month with contractual maturity in June 2020. In June 2016 this subordinated debt was transferred into contributions received for new shares issued but not registered.

In June 2015 the shareholders of the Bank made a contribution received for a new share issue of UAH 2,159 million and in July 2015 it was registered as share capital and as share premium.

During the reporting period, no financial instruments with a dilutive effect were outstanding. Therefore, basic earnings per share equal diluted earnings per share. Earnings per share amounts are calculated by dividing profit for the period attributable to owners of the Bank by the weighted average number of ordinary shares outstanding during the year.

PRIVATBANK GROUP

Selected Explanatory Notes to the Interim Management Statement for the Six Month Period Ended 30 June 2016 (Unaudited)

15 Segment Analysis

Operating segments are components that engage in business activities that may earn revenues or incur expenses, whose operating results are regularly reviewed by the chief operating decision maker (CODM), and for which discrete financial information is available. The CODM is the person - or group of persons - who allocates resources and assesses the performance for the entity. The functions of the CODM are performed by Management Board of the Group.

(a) Description of products and services from which each reportable segment derives its revenue

The Group is organised on the basis of four main business segments:

- Retail banking representing private banking services, private customer current accounts, savings, deposits, investment savings products, custody, credit and debit cards, consumer loans and mortgages, derivative products.
- Corporate banking representing direct debit facilities, current accounts, deposits, overdrafts, loan and other credit facilities, foreign currency and derivative products.
- Investment banking representing financial instruments trading, structured financing, corporate leasing, merger and acquisitions advice.
- Treasury representing interbank loans, deposits, foreign currency exchange operations, arrangement of funding in the international markets, asset and liabilities management, issue of senior bonds and assets backed securities, project financing, negotiation of limits for trade financing with financial institutions.

Transactions between the business segments are on normal commercial terms and conditions. Funds are ordinarily reallocated between segments, resulting in funding cost transfers disclosed in operating income. Interest charged for these funds is based on the Group's cost of capital. There are no other material items of income or expense between the business segments. Segment assets and liabilities comprise operating assets and liabilities, being the majority of the balance sheet, but excluding taxation and head office overheads. Internal charges and transfer pricing adjustments have been reflected in the performance of each business segment.

(b) Factors that management used to identify the reportable segments

The Group's segments are strategic business units that focus on different customers. They are managed separately because each business unit requires different marketing strategies and service level.

Segment financial information reviewed by the CODM does not include information of the Group's subsidiaries and head office functional departments. Regular review of these subsidiary banks is delegated to the local management teams. The CODM obtains financial statements of the Group's subsidiaries. Management considered that information on subsidiary banks is available less frequently in concluding that segments exclude details of the subsidiaries. Head office functional departments do not earn revenues or earn revenues that are only incidental to the activities of the Group and is not considered by the CODM as an operating segment.

(c) Measurement of operating segment profit or loss, assets and liabilities

The CODM reviews financial information of the Bank prepared based on internal accounting rules adjusted to meet the requirements of NBU accounting rules and before consolidation of subsidiaries. Such financial information differs in certain aspects from International Financial Reporting Standards:

- funds are generally reallocated between segments at internal interest rates set by the treasury department, which are determined by reference to market interest rate benchmarks, contractual maturities for loans and observed actual maturities of customer accounts balances;
- income taxes are not allocated to segments;
- loan loss provisions are recognised based on the statutory accounting rules;
- loans and advances to customers are written-off based on statutory requirements;
- fair value of derivatives are not recognised in statutory accounts;
- managing its open currency position the Bank enters into swap transactions that are recognised at cost in segment reporting; and
- consolidation of subsidiaries.

For each business segment the CODM reviews interest income adjusted for intersegment result (net interest on transactions with other segments).

The reconciling items are attributable to the following:

- (a) Embedded derivative assets and embedded derivative liabilities are accounted for at fair value for IFRS purposes. In statutory accounts results from operations with embedded derivative assets are accounted for when cash is received within interest income. Embedded derivative liabilities are not accounted for in statutory accounts.
- (b) Segment reporting is prepared before consolidation of subsidiaries.
- (d) Unallocated balances, revenues and results represent amounts which relate to activities of head office functional departments and are not included in the reportable segments.
- (e) Adjustments of provisions for impairment are related to the difference between the methodology applied to calculate provisions for loan impairment and reversal of accrued interest on impaired loans under the NBU accounting rules used for preparation of management reporting and the methodology used for IFRS reporting. The provision under the NBU accounting rules is calculated based mainly on formal criteria depending on the financial position of the borrower, quality of debt service and collateral, whereas the provision under IFRS requirement is calculated based on incurred loss model. The accrued interest on impaired loans under the NBU accounting rules is recognised at full amount whereas the accrued interest under IFRS requirement is recognised on recoverable amount only.
- (f) The Bank presented swap and spot operations on gross basis in its segment reporting prepared in accordance with the NBU rules.

15 Segment Analysis (Continued)

- (g) Reclassifications are done based on the economic substance of transactions. The Bank presented debt securities issued separately in IFRS financial statements. The Bank presented financial guarantees on gross basis in its segment reporting prepared in accordance with the NBU rules.
- (h) In Segment reporting the CODM doesn't analyse taxation.

The Bank does not analyse the capital expenditure, current and deferred income tax in segment reporting.

(e) Analysis of revenues by products and services

The Group's revenues are analysed by products and services in Notes 13 (interest income), Note 14 (fee and commission income).

(f) Geographical information

Revenues for each individual country for which the revenues are material are reported separately as follows:

| In millions of Ukrainian hryvnias | Six months ended 30 June 2016 | Six months ended 30 June 2015 |
|-----------------------------------|----------------------------------|-------------------------------|
| Ukraine Other countries | 19,266 2,178 | 15,781 1,876 |
| Total consolidated revenues | 21,444 | 17,657 |

The analysis is based on domicile of the customer. Revenues from off-shore companies of Ukrainian customers are reported as revenues from Ukraine. Revenues comprise interest income, fee and commission income and other operating income.

(g) Major customers

The Group does not have customers with the revenues exceeding 10% of the total revenue of the Group.

16 Management of Capital

Compliance with capital adequacy ratios set by the National Bank of Ukraine is monitored monthly with reports outlining their calculation reviewed and signed by the Chairman of the Board and Chief Accountant. Other objectives of capital management are evaluated annually. Under the current capital requirements set by the National Bank of Ukraine banks have to maintain a ratio of regulatory capital to risk weighted assets ("statutory capital ratio") above a prescribed minimum level.

a) The Bank is subject to minimum capital requirements established by covenants stated in loan agreements, including capital adequacy levels calculated in accordance with the requirements of the Basel Accord, as defined in the International Convergence of Capital Measurement and Capital Standards (updated April 1998) and Amendment to the Capital Accord to incorporate market risks (updated November 2005), commonly known as Basel I. The composition of the Bank's capital calculated in accordance with Basel Accord is as follows:

| In millions of Ukrainian hryvnias | 30 June 2016 | 31 December 2015 |
|---|--------------|------------------|

b) As at 30 June 2016, the National Bank of Ukraine requires banks to maintain a capital adequacy ratio of 10% of risk weighted assets calculated in accordance with the regulations of the National Bank of Ukraine (31 December 2015: 10%).

Regulatory capital in accordance with the NBU's regulations comprises:

PRIVATBANK GROUP

Selected Explanatory Notes to the Interim Management Statement for the Six Month Period Ended 30 June 2016 (Unaudited)

16 Management of Capital (Continued)

Net assets included in the table above are adjusted according to the NBU regulations, including the adjustment relating to the calculation of provision for loans and advances to customers in accordance with Regulation No. 23 of the Board of the National Bank of Ukraine dated 25 January 2012 "On Calculation of the Loan Loss Provision by Ukrainian Banks" ("Regulation No. 23").

The Group has complied with all externally imposed capital requirements as at 30 June 2016 and 31 December 2015.

17 Contingencies and Commitments

Capital expenditure commitments. At 30 June 2016 the Group has contractual capital expenditure commitments in respect of construction of premises and acquisition of computers and furniture and equipment totalling UAH 30 million (31 December 2015: UAH 56 million). The Group believes that future net income and funding will be sufficient to cover this and any similar such commitments.

Compliance with covenants. The Group is subject to certain covenants related to its foreign borrowings. In respect of foreign borrowings, the Bank is required to maintain a certain capital adequacy ratio according to local regulatory requirements. As at 30 June 2016 and 31 December 2015, the Bank was in compliance with the capital adequacy requirements set by the NBU for Ukrainian banks. Refer to Note 4.

The regulation on Credit vacation to repay the loan to the NBU for the banks was valid until 10 June 2015. The NBU issued the regulation No.363 "On measures to change the credit conditions of use to maintain the banks' liquidity and repo transactions" dated 9 June 2015, which allows banks to submit application for the review of conditions of contracts on loans from the NBU. According to this regulation, consideration of applications and signing contracts with the banks should have taken place prior to 25 December 2015, during the consideration of applications the sanctions were not applied to the banks.

As at 30 June 2016 the Bank was not under any sanctions.

The Bank is also subject to certain covenants related to refinancing loans obtained from the NBU. In 2015 and 2016 the NBU performed its reviews of the Bank's compliance with refinancing loan's covenants and didn't request early repayment of the loans.

In 2016, the NBU started its regular review of the Bank's activity for 2015. As at the date of these financial statements the Bank is in the process of discussing the results of the NBU's review.

Credit related commitments. The primary purpose of these instruments is to ensure that funds are available to a customer as required. Guarantees and standby letters of credit, which represent irrevocable assurances that the Group will make payments in the event that a customer cannot meet its obligations to third parties, carry the same credit risk as loans. Documentary and commercial letters of credit, which are written undertakings by the Group on behalf of a customer authorising a third party to draw drafts on the Group up to a stipulated amount under specific terms and conditions, are collateralised by the underlying shipments of goods to which they relate or cash deposits and therefore carry less risk than a direct borrowing.

17 Contingencies and Commitments (Continued)

Commitments to extend credit represent unused portions of authorisations to extend credit in the form of loans, guarantees or letters of credit. With respect to credit risk on commitments to extend credit, the Group is potentially exposed to loss in an amount equal to the total unused commitments, if the unused amounts were to be drawn down. However, the likely amount of loss is less than the total unused commitments since most commitments to extend credit are contingent upon customers maintaining specific credit standards. The Group monitors the term to maturity of credit related commitments because longer-term commitments generally have a greater degree of credit risk than shorter-term commitments. Outstanding credit related commitments are as follows:

| In millions of Ukrainian hryvnias | Note | 30 June 2016 | 31 December 2015 |
|---|------|--------------|------------------|
| Guarantees issued | | 1,600 | 1,502 |
| Import letters of credit | | 263 | 609 |
| Irrevocable commitments to extend credit | | 200 | 217 |
| Less: Cash covered letters of credit | | (65) | (63) |
| Less: Provision for credit related commitments | | (47) | (56) |
| Total credit related commitments and financial guarantees | | 1,951 | 2,209 |

The total outstanding contractual amount of undrawn credit lines, letters of credit, and guarantees does not necessarily represent future cash requirements, as these financial instruments may expire or terminate without being funded. The fair value of credit related commitments as at 30 June 2016 and 31 December 2015 was insignificant.

As of 30 June 2016 irrevocable commitments under letters of credit and guarantees issued by the Group of gross amount UAH 65 million (31 December 2015: UAH 63 million) are secured by customer accounts of UAH 65 million (31 December 2015: UAH 63 million).

Credit related commitments are denominated in currencies as follows:

| In millions of Ukrainian hryvnias | 30 June 2016 | 31 December 2015 |
|-----------------------------------|--------------|------------------|
| US Dollars | 989 | 902 |
| Ukrainian Hryvnias | 516 | 879 |
| Euro | 239 | 224 |
| Other currencies | 207 | 204 |
| Total | 1,951 | 2,209 |

As of 30 June 2016 the Group had undrawn credit limits on credit cards of UAH 21,549 million (31 December 2015: UAH 19,383 million) that are available to credit cardholders. These credit limits are revocable. The Group on a regular basis monitors activity on the cards and based on the frequency and pattern of withdrawals and repayments done by borrowers is able to reduce limits on credit cards unilaterally. Provision for undrawn credit limits on credit cards was not significant as at 30 June 2016 and 31 December 2015.

Fiduciary assets. These assets are not included in the Group's consolidated statement of financial position as they are not assets of the Group. Nominal values disclosed below are normally different from the fair values of respective securities. The fiduciary assets held by the Group on behalf of its customers fall into the following categories:

| 30 June 2016 Nominal value | 31 December 2015 Nominal value |
|-------------------------------|-----------------------------------|
| 6,542 851 | 6,512 834 283 |
| | , |

17 Contingencies and Commitments (Continued)

Funds under trust management. Funds under trust management represent assets managed and held by the Group on behalf of customers. The Group earns commission income for holding such assets. The Group is not subject to interest, credit, liquidity and currency risk with respect of these assets in accordance with the agreements concluded with the customers. Loans are granted on behalf of customers who have remitted a deposit as collateral for the loans. As of 30 June 2016 assets under trust management amounted to UAH 5,552 million (31 December 2015: UAH 4,661 million).

Assets pledged and restricted. The Group had assets pledged as collateral with the following carrying value:

| | Note | 30 June 2016 | | 31 Decemb | er 2015 |
|---|---------|------------------------------|-----------------------|-----------------------------------|----------------------------------|
| | | Asset pledged and restricted | Related liability/ | Asset pledged R and restricted | delated liability/ commitment |

| Total | | 52,859 | 41,688 | 52,310 | 32,884 |

Gross receivables under swap, forward and spot agreements presented above are recognised on a net basis in the statement of financial position, giving rise to a derivative financial asset or liability within other financial assets or other financial liabilities, respectively.

Mandatory reserve balances in the amount of UAH 247 million (31 December 2015: UAH 287 million) represent mandatory reserve deposits which are not available to finance the Group's day to day operations as disclosed in Note 5.

As disclosed in Note 6, balances due from other banks of UAH 1,878 million (31 December 2015: UAH 1,574 million) have been pledged as cover for letters of credit and international payments.

18 Derivative Financial Instruments

Foreign exchange and other derivative financial instruments entered into by the Group are generally traded in an over-the-counter market with professional market counterparties on standardised contractual terms and conditions. Derivatives have potentially favourable (assets) or unfavourable (liabilities) conditions as a result of fluctuations in market interest rates, foreign exchange rates or other variables relative to their terms. The aggregate fair values of derivative financial assets and liabilities can fluctuate significantly from time to time.

The table below sets out fair values, at the end of the reporting period, of currencies receivable or payable under foreign exchange forward contracts entered into by the Group and presented within other financial assets and other financial liabilities. The table reflects gross positions before the netting of any counterparty positions (and payments) and covers the contracts with settlement dates after the respective end of the reporting period. The contracts are short term in nature.

At 30 June 2016, the Group had outstanding obligations from unsettled spot transactions with foreign currencies of UAH 7,929 million (31 December 2015: UAH 1,830 million). The net fair value of unsettled spot transactions is insignificant.

During the year ended 30 June 2016 the Group incurred a loss of UAH 886 million (2015: a loss UAH 293 million) resulting from foreign exchange spots, forwards and swaps that is accounted for in other gains less losses of the consolidated statement of profit or loss and other comprehensive income.

As disclosed in Note 4, as at 30 June 2016 the Group had outstanding derivatives embedded in loans issued to customers which were separated from the host instrument and carried at fair value of UAH 23,239 million (31 December 2015: UAH 30,673 million). This embedded derivative is represented by a currency option maturing in up to 3 years. The strike price was from UAH 23.27 to UAH 27.25 per USD 1 (31 December 2015: from UAH 15.75 to UAH 30.01 per USD 1).

During 2015 an embedded derivative liabilities, arising from the customer accounts, were recognised in the amount of UAH 3,947 million and repaid. Those customer accounts were received in UAH with the condition of compensation to be paid by the Bank in the event that the official exchange rate of UAH depreciates against USD.

19 Fair Value of Financial Instruments

Fair value measurements are analysed by level in the fair value hierarchy as follows: (i) level one are measurements at quoted prices (unadjusted) in active markets for identical assets or liabilities, (ii) level two measurements are valuations techniques with all material inputs observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices), and (iii) level three measurements are valuations not based on observable market data (that is, unobservable inputs). Management applies judgement in categorising financial instruments using the fair value hierarchy. If a fair value measurement uses observable inputs that require significant adjustment, that measurement is a Level 3 measurement. The significance of a valuation input is assessed against the fair value measurement in its entirety.

Recurring fair value measurements.

Recurring fair value measurements are those that the accounting standards require or permit in the consolidated statement of financial position at the end of each reporting period. The level in the fair value hierarchy into which the recurring fair value measurements are categorised are as follows:

| | | 30 June | 2016 | | | 31 Decemb | er 2015 | |
|--|---------|------------|---------|--------------|----------|-----------|---------|--------------|

| TOTAL LIABILITIES RECCURING FAIR VALUE MEASUREMENTS | - | - | 22 | 22- | - | - | 3 | 3 |

Valuation technique used for level 2 measurements is linked to market prices of quoted shares of the same companies on active market.

Embedded derivative assets and liabilities are classified into level 3 instruments because these instruments require management to make assumptions about credit risk of the counterparty which are not supportable by observable market data.

19 Fair Value of Financial Instruments (Continued)

A reconciliation of movements in Level 3 of the fair value hierarchy of the embedded derivative assets for the period ended 30 June 2016 and 31 December 2015 is as follows:

| In millions of Ukrainian hryvnias | Embedded derivatives |
|---|----------------------|
| Fair value at 1 January 2015 | 19,978 |
| Initial recognition of derivative | 2,029 |
| Cash received | (1,005) |
| Gains less losses from embedded derivative assets | 9,671 |
| Fair value of embedded derivative assets at 31 December 2015 | 30,673 |
| Initial recognition of derivative | 1,078 |
| Gains less losses from embedded derivatives | (986) |
| Cash received | (425) |
| Reclassification to embedded derivative with confiscated collateral | (7,101) |
| | |

In addition to the amount of gains less losses from embedded derivatives disclosed above, the Group recognised a loss of UAH 10,047 million in respect of embedded derivative liabilities as disclosed in Note 4 and 30 in its in profit or loss for 2014. In 2015, revaluation gain was recognised in the amount of UAH 793 million at final repayment of these embedded derivative liabilities.

During 2015 an embedded derivative liabilities, arising from the customer accounts, were recognised in the amount of UAH 3,947 million and repaid. Those customer accounts were received in UAH with the condition of compensation to be paid by the Bank in the event that the official exchange rate of UAH depreciates against USD.

The fair value valuation of embedded derivative assets and liabilities is reviewed on a regular basis by the Bank. The management considers the appropriateness of the valuation model inputs, as well as the valuation result. Embedded derivative assets and liabilities arise in the loan agreements and private placements of UAH bonds, respectively issued at fixed interest rates in local currency (UAH) but indexed to changes in UAH/USD exchange rate. The embedded derivatives are valued at the net present value of estimated future cash flows. The fair value model is based on the observable data, such as expected UAH/USD exchange rates, discount rate and non-observable data such as credit risk.

The expected UAH/USD exchange rates are provided by the Treasury. These rates are supported by the forecasts of reputable international agencies and ranged from 25 to 30 UAH/USD exchange rates for the next year. The used discount rate is calculated by the Treasury and represents a weighted coupon rates on available quoted bonds adjusted for risk premium which were issued in the Ukrainian market during the reporting period. The credit risks are determined by the Risk-Management Division on the individual basis for each borrower.

As at 30 June 2016 the management used the following inputs: expected exchange rates from 25.65 UAH/USD to 28.02 UAH/USD (31 December 2015: from 23.49 UAH/USD to 25.71 UAH/USD), discount rate of 15.21% (31 December 2015: 16.40%) and average provision under the credit risk for embedded derivative asset of 79.92% (31 December 2015: 65.17%). The sensitivity to valuation assumptions is disclosed in the Note 4.

The financial effect of collateral is presented by disclosing collateral values separately for (i) those assets where collateral and other credit enhancements are equal to or exceed fair value of the asset ("over-collateralised assets") and (ii) those assets where collateral and other credit enhancements are less than the fair value of the asset ("under-collateralised assets").

The fair value of financial derivatives arising from swap, forward and spot transactions was estimated based on estimated future cash flows expected to be received discounted at current interest rates for new instruments with similar credit risk and remaining maturity.

20 Related Party Transactions

Parties are generally considered to be related if the parties are under common control, joint control or one party has the ability to control the other party or can exercise significant influence over the other party in making financial or operational decisions. In considering each possible related party relationship, attention is directed to the substance of the relationship, not merely the legal form.

At 30 June 2016 and 31 December 2015, the outstanding balances with related parties were as follows:
